

Tricad Service Italia is born from the experience of its founders in February 1995 through a partnership with the German engineering company triplan gmbh. As solution provider we daily verify and apply the best methods to make the industrial plant profitable from the engineering starting point.

This is the goal we wish to win together with customers to improve and check the productivity and ROI.

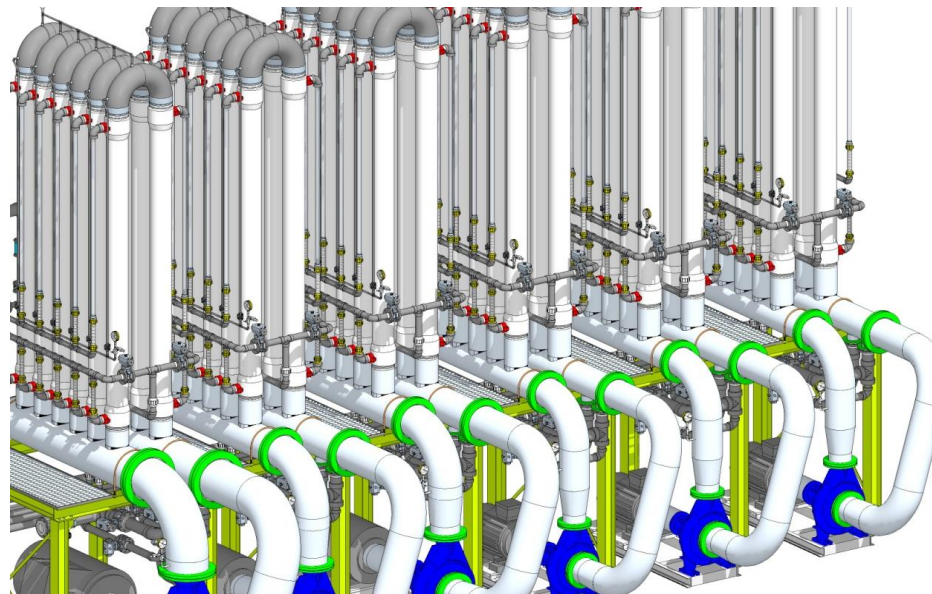

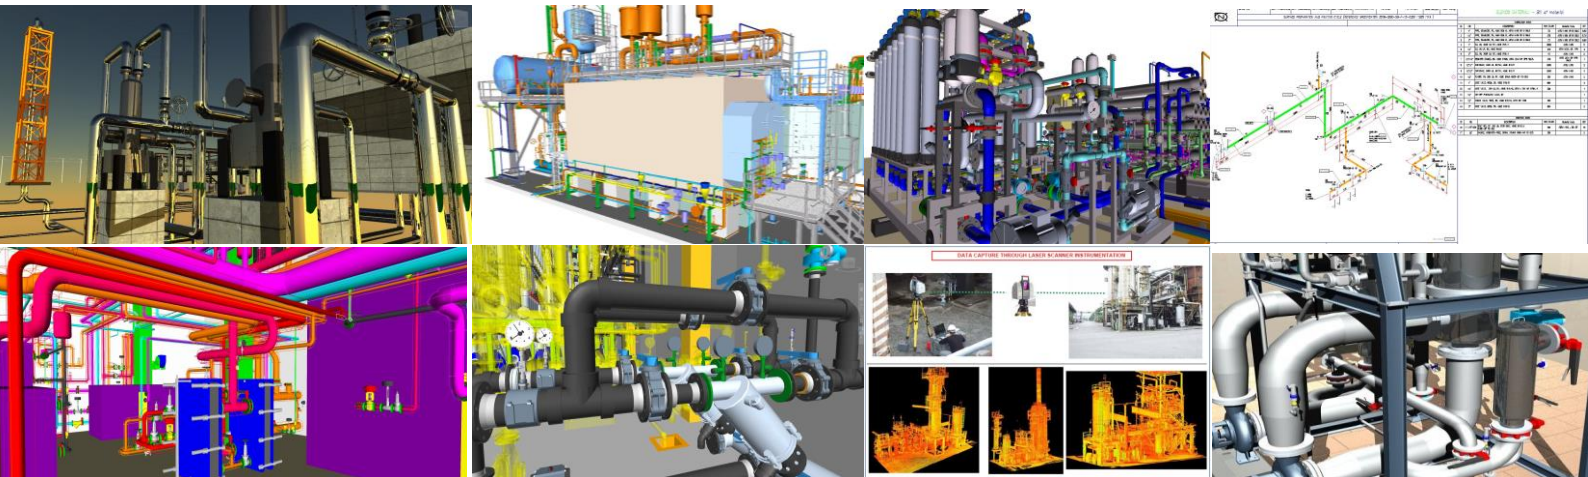

Over the years Tricad is increasing its knowledge in plant engineering in the chemical, pharmaceutical water purification, food, energy, automotive, oil & gas areas.

Our technical staff continues to implement the offer of plant engineering software, to insert and customize new applications and to create symbol catalogs useful to speed up the preparation and execution of jobs.

Tricad can take care about following services:

- Basic engineering
- Feasibility study and 3d modelling
- ingegneria di dettaglio
- detailing engineering
- isometric sketch
- laser scanning and 3d clever conversion into most plant design formats
- stress analysis piping
- structure calculation
- model review with site constructability

▶ PLANT DESIGN SUITE

P&iD, Plant3D, Sketch, GA piping

▲ ADVANCE STEEL

Steel structure and detailing

▶ BUILDING DESIGN SUITE

Hvac, cable tray, building

■ NAVISWORKS

Design Review (all formats .vue - sp3d included)
